

BIBLE & SCIENCE

Bible & Science Seminars

We live in a world dominated by scientific discovery and new knowledge. Much of what science uncovers about our universe leads to new knowledge touching areas once considered to be unfathomable - mysteries which had once been explicable only by religion and scriptural interpretation.

Is it possible to believe in God in the light of scientific discovery? Are Science and the Bible compatible and what does the Bible really have to say about the mysteries which science appears to be uncovering?

Bible & Science is an interdenominational Christian group in the City of Worcester aimed at promoting intelligent debate about faith in a scientific context.

The Seminars at Lindisfarne House are open to the public.

The Organisation Team are Professor Geoff Pritchard, Richard and Purvi Wood, Ann and Graham Coyle and Dr Kim Stansfield.

These meetings are for anyone wanting to make sense of this changing world, especially those interested in how scientific advances might impact on religious beliefs. They are not restricted to scientists or graduates.

Speakers are requested to stop every 15 minutes and discuss with the audience what has been said so far. (The proceedings end at 9:30 p.m. with refreshments).

Programme 2009-10

All meetings will be held on the third Tuesday in the month at Lindisfarne House, 4 Barbourne Terrace, Worcester, WR1 3JS at 8 pm. (as in 2008-9)
